EXPERIENCE

FundThrough, Toronto, Canada – Staff Software Engineer

REMOTE • Aug 2023 - PRESENT

Impact: From Series A to Series B, transformed complex onboarding (banking, identity, invoice), funding, and risk operations into scalable product workflows.

- Launched Flex, a new funding product line, in 2 months
- Integrated banking (Plaid), Identity Verification, & Invoice systems
- Translated risk policies into automated funding decision systems
- Architected funding approval workflows and custom rule engines
- Owned client platform; led legacy modernization for scalability
- Built client onboarding workflows reducing completion time by over 40%
- Built self-serve workflows (customer & invoice management, reports, dashboards, and risk communication) increasing product adoption by 65%
- Partnered with Risk and Ops to ship AI-powered document verification
- Implemented E2E automated testing achieving 90% coverage
- Introduced feature flags enabling safe releases and experimentation
- Optimized reports and invoices performance from 4s to under 2s
- Established system patterns and RFCs improving delivery consistency

Proposify, Halifax, Canada – Senior Software Engineer

REMOTE • Aug 2022 - Jun 2023

Impact: Joined to drive SPA migration and next-generation proposal builder; shipped core React components and modernized authoring experience.

- Applied React expertise supporting migration to modern architecture
- Built reusable components powering next-gen scalable proposal builder
- Prototyped drag-and-drop editing; improved authoring experience
- Promoted React best practices and API contract integrity across teams

CAREER HIGHLIGHTS

Built products from zero as a founding engineer across multiple startups

Automated complex manual processes through configurable workflow systems

Deep experience integrating third-party services across CRM, banking, identity, and analytics platforms

Modernized legacy systems enabling scalability, reliability, and long-term evolution

SKILLS

System & API Design,
Workflow Automation,
Third-Party Integrations,
Performance & Reliability,
Observability & Monitoring,
Web Security & SOC2,
Testing & Quality Engineering,
Feature Flags & Experimentation,
Accessibility, Internationalization,
AI-Assisted Development

Rocketlane, Chennai, India – Founding Software Engineer

REMOTE • Jun 2020 - Mar 2022

Impact: Founding engineer through Seed to Series A; built platform from zero, architecting product foundations and workflow systems for rapid growth.

- Built platform from zero, supporting rapid product growth
- Architected metadata-driven systems enabling dynamic forms and fields
- Developed enterprise planning and scheduling tools for service workflows
- Architected UI design system in collaboration with Head of Design
- Optimized performance for 30k+ records with smooth interactions
- Remediated OWASP vulnerabilities supporting SOC2 security compliance
- Drove product adoption insights via LogRocket integration
- Mentored engineers and promoted maintainable architecture patterns

Happyfox, Chennai, India – FullStack Developer

ON-SITE • Nov 2016 - Dec 2019

Impact: Promoted to founding engineer for new BI product line; shipped enterprise integrations and workflows for clients like Jabra and Whirlpool.

- Built 7+ integrations (CRM) expanding enterprise workflows
- Built enterprise high volume ticket creation workflows
- Built end to end admin dashboard and customer management system
- Developed advanced filters supporting complex ticket workflows
- Engineered BI dashboards enabling data-driven insights for power users

TECHNICAL LEAD ENGAGEMENTS

Engaged to take MVPs or legacy systems to production-grade, with focused outcomes:

TestSigma, Technical Lead, 2 months

Led team of five engineers modernizing WordPress to Next.js and MongoDB, reducing CI build times by 80%, and achieving 100% SEO performance.

Deeprooted, Technical Lead, 3 months

Architected and led Shopify e-commerce migration to Next.js, improving performance and flexibility; achieved Lighthouse score above 90

Trakdesk, Technical Lead, 6 months

Led modernization of helpdesk system from Ember.js and PHP to Node.js and React.js for product feature expansion.

TECHNOLOGIES

React.js • TypeScript
Next.js • Node.js • REST APIs
PostgreSQL • MongoDB • Redis
tRPC • Fastify • Hono.js
Python • Django • ORM
Monorepos • Vite • Storybook
Redux • Tailwind CSS
Playwright • Testing Library
Jest • Vitest • Git • CI/CD
AWS • Vercel • Docker
Sentry • New Relic
FullStory • LogRocket
MCP • Copilot • Cursor
Claude • OpenAI

COMMUNITY

Speaker at TorontoJS,
BrowserStack, and React
Meetup events

Lead Developer at TorontoJS

EDUCATION

- Bachelor of Technology
- MBA – Systems Management
